

JAVASCRIPT | DAY 7 | CLASSWORK

Exercise 1:

To practice how to use libraries, take you **First Exam** and add one slider from swiperJS to it, it will be instead of the hero section, and add animation to the images when we open the page, the elements will appear to the website with some kind of animation (try it with animate CSS).

Exercise 2:

Try to use a new library called sweetalert2, to learn how to use JavaScript libraries, you need to try to see what you need everytime you are using any library <https://sweetalert2.github.io/>.
