

PHP | DAY 5 | CLASSWORK

Challenge

Create a CRUD application choosing one of the below themes:

- Restaurant
- Hobby blog
- Car rental
- Hotel booking

For this project, you shall need only one table. think carefully about the columns.

Your application should have the basic functions:

- Display
- Create
- Edit
- Delete

Note: this exercise is based on the pre-work, you also need to have an image upload service in order to choose an image locally, plus the create, read, update, delete actions
